MY DIFFERENT PERSONALITIES

THE DEVELOPER
• handles incoming requests like a pro, and never misses a deadline even if it was yesterday.
• always understands clients' business needs as she is capable of reading minds.
• delivers only the best as it comes straight from her heart.

THE CREATIVE MIND
• is the queen of unconventional solutions such as picking oranges from an apple tree and making the best lemonade you ever tasted.
• wriggles her way out of the most impossible situation with resourcefulness and ingenuity – inspired by the one and only MacGyver.
• builds ideas on the combination of constraints and free-thinking like an artist and a scientist in tandem.

THE EXPLORER
• thrives in the space of the unknown and conquers the uncharted with the help of her sixth sense.
• she is not afraid to ask for help in case her compass is not working.
• Google is her best friend! Together they could conquer the whole wide world.

WORK EXPERIENCE
